ManyBooks is one of the best resources on the web for free books in a variety of download formats. There are hundreds of books available here, in all sorts of interesting genres, and all of them are completely free. One of the best features of this site is that not all of the books listed here are classic or creative commons books. ManyBooks is in transition at the time of this writing. A beta test version of the site is available that features a serviceable search capability. Readers can also find books by browsing genres, popular selections, author, and editor's choice. Plus, ManyBooks has put together collections of books that are an interesting way to explore topics in a more organized way.

Anatomy Of The Quran

A common criticism of the Quran, as with the Hadith, is that it contains numerous scientific and historical errors, with no obvious attempts to differentiate its understanding of the natural world and historical events from the common folklore and misconceptions of the people living in 7 th century Arabia. Modern responses typically appeal to metaphor, alternative meanings, or phenomenological ...
