Such programs may be used to meet directives from senior management or to address a performance issue. Understanding the need for the training program provides insight into the expectations the program must meet.

Guidance for Developing a Quality Systems Training Program

In artificial intelligence, an expert system is a computer system that emulates the decision-making ability of a human expert. Expert systems are designed to solve complex problems by reasoning through bodies of knowledge, represented mainly as if-then rules rather than through conventional procedural code. The first expert systems were created in the 1970s and then proliferated in the 1980s.

Expert system - Wikipedia

Rating systems are a type of building certification system that rates or rewards relative levels of compliance or performance with specific environmental goals and requirements. Rating systems and certification systems are frequently used interchangeably.
