A technique called " in vitro fertilization " (IVF) now makes it possible to gather eggs from the mother, fertilize them with sperm from the father, and place the embryo into the uterus of a...

### Surrogate Mothers: What It Is and How Does Surrogacy Work

One of the best things I did when I started to realize having a baby would be harder than I thought was to start a blog about it. One, because I like attention, and two, I didn't know anyone going through fertility issues in real life. Throughout my journey, I've kept a public blog and I still get several emails a month from other women who have gone through infertility and most of them ...

### **Having Your Baby Through Egg Donation by Ellen Sarasohn Glazer**

Using your own eggs, your chance of having a baby through gestational surrogacy is as good as or higher than that of a woman your age using traditional IVF. Recent national data on gestational surrogate IVF cycles using the intended mother's eggs show the following live birth rates per cycle (ages refer to the intended mothers' age):

### **Gestational carriers (surrogacy) | BabyCenter**

Using your own eggs, or the eggs of a known donor whom you are not compensating or paying an agency, can often save you \$16,000 to \$20,000 or more. But if you are using eggs over the age 35, it might take you longer to achieve pregnancy. A 2012 study from the Center for Disease Control on IVF success rates reports that over 56% of transfers using eggs from an egg donor younger than 35 years resulted in a live birth.

### **Surrogacy Using Your Own Eggs or Known Donor: What will ...**

IVF technology in the setting of poor egg quality is much less successful. Women who have been unable to have a baby with their own eggs can improve their chance of having a baby dramatically by using eggs donated by a younger egg donor. Women can electively choose to freeze younger healthy eggs for the future to give themselves a finite number of additional opportunities to have a baby. This process is known as egg freezing.

### **What are my chances of having a baby with IVF? | VARTA**

The most commonly used method of doing this is to use an agency to search for a donor. Egg donors who donate through agencies are heavily screened and evaluated in aspects such as physical features, personality, family history, health records, etc.

### **If I Use Donor Eggs Will The Baby Look Like Me | Advanced ...**

Although the baby will not share genetic material with both mothers, egg sharing is a way for both women to participate in the pregnancy. Ultimately, women can use artificial insemination, IVF using their own eggs and uterus, or IVF with their partner's eggs and uterus. What Lesbian Couples Should Seek in a Clinic

### **How Lesbians Can Get Pregnant and Have Children**

If I were to advise a woman considering having a baby through in vitro fertilization with a donated egg, I would tell her to do some research, but not too much. Read blogs on the subject, but not too many. Give your mind just enough to think about without overwhelming it with all the differing opinions on the subject.

### **How Egg Donation Made Me A Mom Of 4 - Scary Mommy**

In an IVF cycle, you inject fertility drugs prescribed by your reproductive endocrinologist to stimulate egg production and help the eggs mature. When they are ready, they are extracted from your ovaries with a syringe. Your eggs are fertilized with donor sperm in the embryology lab.
