If we feed our food waste which is the current government favorite way of getting rid of food waste, to anaerobic digestion, which turns food waste into gas to produce electricity, you save a paltry 448 kilograms of carbon dioxide per ton of food waste. It's much better to feed it to pigs. We knew that

I first opened my eyes to the global food waste scandal as a teenager when feeding my pigs at home with waste from the local baker, greengrocer and my school canteen. The food I found in supermarket bins was so shockingly fresh and high quality that I started eating it myself as a protest against the injustice of food waste.
